Israel is dropping bombs on Gaza (or Lebanon)

Settlers are rioting in Hebron (or Yahound)

Even when things are "quiet" a siege is starving Gaza and suffocating the West Bank while "targeted" killings slay bystanders

But... what can I do?

1. Protest!
   On the street we can show we don't approve of Israel's actions, and get the media to report it.

2. Contact our representatives
   The Israel lobby has convinced politicians that Americans don't care about Palestinian rights

3BDS

...wait, what?!
What IS BDS?

1. Boycott - Products made in Israel or the occupied territories
2. Divestment - From Israel and companies that support Israel
3. Sanctions - Against Israel by governments and organizations

In 2005, over 170 Palestinian civil society groups called for international BDS movements until Israel ends the occupation, protects the rights of Palestinian citizens of Israel, respects the right of refugees to return to their homes. The international boycott of apartheid South Africa helped end that oppression. This non-violent tactic can do the same for Palestine.

How DO I BDS?

As an individual, look for products that say "Made in Israel" and check online for lists of things that might not be labeled.

Produce...
Wine...
Cosmetics...

It's a long list!

Start a discussion in your church, union, or shareholder meeting about ethical alternatives for investment.

$1 billion NY pension fund?

We have to be ready to fight. They'll call us anti-Semitic even if we're Jewish!

Join a local BDS group to pressure the government. Can't find one? Start your own!

Join BDS meeting tonight.

Luckily, there's a lot of information on the internet!
